NEUROPSYCHOLOGIST
AUTHOR · KEYNOTE · SPEAKER

Long Biography

FRIEDERIKE FABRITIUS, MS, is a neuroscientist, keynote speaker, and award-winning author. She applies insights from neuroscience to guide organizations, teams and individuals towards achieving higher or peak performance, more innovation, and greater well-being. As a leadership specialist, she has extensive experience in working with top executives at Fortune 500 companies. Now a sought-after keynote speaker, she has captivated and inspired audiences at events hosted by large multinational corporations, such as Bayer, Audi, Volkswagen, Google, Siemens, trivago, Montblanc, LafargeHolcim, and thyssenkrupp as well as Deloitte, Ernst & Young, and Harvard Business Review.

Friederike is the award-winning author of *The Leading Brain: Neuroscience Hacks to Work Smarter, Better, Happier* (Penguin/Random House, 2017). The book has been translated into multiple languages and has won many accolades as both fascinating and fun.

A neuropsychologist by education, Friederike focuses on giving keynote speeches to help leaders use solid scientific findings to increase their effectiveness. She is also an expert in brain-friendly learning. Friederike herself has used these methods to learn six languages that she now speaks fluently.

After starting at the Max Planck Institute for Brain Research and then continuing as a management consultant with McKinsey, Friederike now applies her unique expertise in leadership as a keynote speaker. She has empowered countless clients to reach their full potential and deliver peak performance at make-or-break moments.

Building on the success of *The Leading Brain* in the workplace, Friederike is currently at work on a new book on the neuroscience of diversity.

She lives in Germany with her husband and their five kids.
